ABSTRACT

PURPOSE: To improve the operability of an electronic notes by displaying the information stored in an information memory part on plural sheets of plane display parts which are joined together like a notebook.

CONSTITUTION: The electronic notes contain plane display parts P(sub 1)-P(sub n), where the parts P(sub 1) and P(sub 2), P(sub 3) and P(sub 4)... are joined together back to back respectively. These n/2 sheets of display parts are bound in the form of a notebook including a cover 11, a back cover 12 and a backbone cover 13. These covers 11-13 include plural video memory parts, information memory parts and display control parts of component elements provided for each page. Furthermore a connector 14 is added for connection to another device. When a prescribed document, etc. are stored in the video and information memory parts, the display information are displayed at a display part P of each display control part.
